Welcome to the symposium!

“Clinical anatomy of the Groin & Inguinal hernia repairs with da Vinci RAS”

David J. Lourié MD, FACS is the Director of Minimally Invasive Surgery at Huntington Health in Los Angeles, California. Dr. Lourié built his initial reputation in advanced laparoscopic surgery, developed and designed some of the first specialized laparoscopic operating rooms in the United States in the early 1990's, and began performing the first of thousands of laparoscopic hernia repairs at that time.

Dr. Lourié started performing robotic surgery in 2006 and published his first 100 robotic gastric bypass surgeries in 2008. Dr. Lourié was one of the first surgeons in the world to use totally robotic staplers in gastric, intestinal, colorectal, and liver surgery. An internationally recognized hernia expert, also known for his engaging presentations, detailed videos, and his ability to make anatomy and robotic surgery relatable to a wide variety of surgeon audiences.
